**How to set ICC profiles in a dry-lab printer**

1. If you use Adobe Photoshop

Open the print window
Set your printer
In the Color Management set: **Photoshop Manages Color**
Chose your printer profile

Click the **Printer Setup** button.
In the printer dialog box chose your paper type, image quality,
and set **No Color Adjustment**.
click the **OK** button

Click the **Print** button

2. If you use another software

In this case all settings you do set in the printer driver.
Choose the control panel
Choose devices and printers
Click the right mouse button at your printer icon and chose the **printer settings.**
Click the **Color Management** tab, and please confirm your choice.
Set your printer and set the profile selection as **Manually.**
Click the **Add** button to add your profile.
After this set as the **Default Profile.**
Close the window

In the driver settings, chose the **ICM** and click the **Advanced** button

In the next window set the check box: **show all profiles**
and chose the right profile.
Close the window.

After this, set the other settings and click **OK**.

3. If you want to add a profile to your OS, click the right mouse button
   at the name of profile and chose **Install profile.**
